

NORTH IOWA FRESH BOUNTY

WORKSITE INTRODUCTION

WORKSITE FARMERS MARKETS ARE AMONG THE "15 COOLEST EMERGING COMPANY PERKS FOR 2019"

Research finds that the most effective workplace wellness program create a culture of health and fitness, rather than putting the responsibility of eating right and exercising solely on the shoulders of employees.

NORTH IOWA FRESH FACTS

Our innovative program for worksites offers 20 weeks of top quality locally grown produce delivered conveniently to your workplace. We are also offering two storage options and hope to offer a variety of a-la-cart products throughout the season.

By working with more than 10 local producers we have put together a box that is diverse, fresh and reliable. Our program is designed to complement your existing wellness efforts by offering you an easy way to promote healthy eating while also supporting our community and the local economy.

Additional Program Features:

Weekly e-newsletter – list of weekly products, nutrition and recipe information, preservation tips and stories from our farmers and partners.

Support for your existing wellness efforts – we are happy to explore how our deliveries can be a part of your worksite's wellness promotion and education.

⇒ Some companies feature healthy food in the break room or a Wellness Wednesday. We can help you plan how to feature vegetables from the weekly boxes in your wellness spotlight.

HOW TO GET INVOLVED!

1. Contact Andrea to set up a meeting with your company's HR or Wellness Coordinator/team to explore how this program can fit with your existing efforts.
2. Set up an employee information meeting which will include a short introductory video, multiple copies of our brochure and a powerpoint presentation to help your employees understand the program and explore which options are the right fit for their family.

Call Now and take the first step toward healthier, happier employees!

SITE HOST NEEDS

- Designated contact person - who is available to assist on delivery day and stay in touch with Andrea related to updates and other issues that arise
